Education

Dr. Rammanohar Lohiya Avadh University 2021 - 2025
BTech in Electronic & Communication Engineering *CGPA : 7.8*
Holy Child Academy Senior Secondary School 2021
Class XIIth *Percentage: 90.0*
Holy Child Academy Senior Secondary School 2019
Class Xth *Percentage: 87.2*

Experience

Software Engineer at VahanHelp Pvt. Ltd. **June 2026 – Present**
• Led the development of VahanHelp.in and the internal CRM ParivahanMitra.com, building scalable full-stack applications using the MERN Stack.
• Developed secure RESTful APIs, implemented RBAC, OTP authentication, Razorpay payment gateway, WhatsApp API, Challan V2, and RC API integrations.
• Deployed and maintained applications on AWS (EC2 S3), ensuring scalability, security, high availability, and optimized performance.

Backend Developer at CDAC Mohali **Sept 2025 - May 2026**
• Working on a live Employee Management System project, primarily handling backend development using Node.js, Express.js, JavaScript, and managing MySQL database operations.
• Designing, developing, and testing RESTful APIs using Postman, and integrating backend services with the Angular frontend.
• Implementing business logic, handling data integration, and gaining hands-on experience in real-world project execution and team collaboration.

Research Intern at IIIT Allahabad [View] **May - July 2024**
• Collaborated on the development of a context-aware medical health chatbot using LLaMA-2, LangChain, and Hugging Face, focusing on real-time conversational AI solutions.
• Developed expertise in prompt engineering, retrieval-augmented generation (RAG), and semantic search using FAISS, improving the chatbot's accuracy and relevance.
• Developed an interactive frontend using Streamlit, integrating it with large language models to enable intuitive user interaction with AI.

Projects

Medibot - AI Medical Chatbot [Link]
AI-powered medical chatbot using RAG ***Python, LangChain, FAISS, Hugging Face, Streamlit, PostgreSQL***
• Developed a Retrieval-Augmented Generation (RAG) medical chatbot using LangChain, FAISS, and Hugging Face (Qwen2.5-7B-Instruct) to provide context-aware, hallucination-free answers from medical documents through semantic search.
• Built an interactive Streamlit application with PostgreSQL-backed user authentication and persistent chat history, implementing document chunking, embeddings, and low-latency vector retrieval for accurate healthcare information.

QuickGPT– AI Chat Application [Link]
Full-stack MERN application integrating OpenAI API for intelligent chat ***React.js,Node.js,Express.js,MongoDB,OpenAI API, ImageKit***
• Developed a full-stack AI chat application supporting both text and AI-generated image responses, with secure JWT-based authentication, persistent chat history, and a credit-based usage system.
• Designed and integrated RESTful APIs connecting MongoDB, Google's Gemini API, and ImageKit for real-time AI image generation, along with Stripe for subscription-based credit purchases and webhook-driven payment confirmation.

SketchBattle – Real-time Multiplayer Drawing & Guessing Game [Link]
Full-stack real-time multiplayer game application ***React.js, TypeScript, Node.js, Socket.IO, Tailwind CSS***
• Built SketchBattle, a real-time multiplayer drawing-and-guessing game with live canvas sync across clients, turn-based rounds, word-guess matching, and dynamic scoring using Socket.IO (WebSockets).
• Designed an OOP backend architecture (Player, Room, Game, RoomManager) implementing a turn-based state machine for room management, hint reveals, and scoring, plus a solo practice mode with simulated bot players.

Technical Skills

Programming Languages: C, C++, JavaScript, SQL, Python, HTML5, CSS3.

Frontend Backend: React.js, Node.js, Express.js, TypeScript, Tailwind CS, RESTful APIs, JWT

Cloud Tools: AWS EC2, Amazon S3, Git, GitHub, Docker, Postman.

AI Databases: LangChain, LLaMA 2, Hugging Face, FAISS, RAG, MongoDB, MySQL.

Core CS Fundamentals: Data Structures Algorithms, Operating System, Object Oriented Programming, Database Management System, Computer Network, System Design.

Achievements

• Solved over 200+ data structures and algorithms problems across various platforms, enhancing my coding skills.
• Earned LeetCode 50 Days Consistency Badge for solving daily coding problems, strengthening problem-solving skills.
• Completed Introduction to Generative AI course, strengthening knowledge of LLMs, prompt engineering, and AI applications. [View]
